

Saurabh Mule | .Net Full-Stack Developer

mulesaurabh45@gmail.com | +91-7666727302 | [LinkedIn](#)

Summary

Senior Software (.NET) Developer with around 4 years of experience in designing, developing, and deploying high-performance web applications and RESTful APIs using .NET Core, ASP.NET MVC, C#, ReactJS and SQL Server. Skilled in building scalable, secure, and cloud-ready solutions with hands-on expertise in Azure services, microservices architecture, Entity Framework, and CI/CD pipelines. Adept at optimizing system performance, modernizing legacy applications, and implementing best practices such as SOLID, clean architecture. Proven ability to lead development teams, collaborate with cross-functional stakeholders, and deliver high-quality solutions within agile environments.

Experience

ZIGRAM Data Technologies Pvt. Ltd.

Sep 2025- Apr 2026

Senior Software Developer

- Designed, developed, and maintained scalable applications using **.NET Core**, ensuring high performance and maintainability.
- Built RESTful APIs using **.NET Core Web API**, implementing authentication, logging, exception handling, and versioning.
- Optimized application performance by improving API response time and refactoring legacy .NET codebases.
- Developed dynamic and responsive UI components using ReactJS, JavaScript.
- Hands-on experience with **Microsoft Azure** for cloud-based applications, monitoring and service Integration.
- Coordinated with cross-functional teams, business stakeholders, and QA to maintain smooth delivery pipelines.
- Led a team of .NET developers, managing sprint planning, code reviews, and delivering complex features on time.

Rising Phoenix Infotech Solutions

Nov 2023- Sep 2025

Software Engineer

- Designed, developed, and maintained scalable web applications using **ASP.NET MVC, .NET Core, SQL Server, jQuery, and JavaScript**, contributing to multiple high-quality websites and enterprise web solutions.
- Demonstrated strong problem-solving skills by resolving complex technical issues, optimizing application performance, and enhancing overall system stability.
- Participated in the full Software Development Life Cycle (SDLC), including requirement analysis, design, development, testing, and deployment.
- Collaborated effectively with cross-functional team members to gather requirements, design application features, and implement robust, user-focused solutions.

Tata Consultancy Services

Jul 2022- Nov 2023

Assistant System Engineer

- Designed, developed, and consumed **RESTful APIs** for product, customer, and order management functionalities.
- Created and maintained **MVC Controllers, Models, and Views** to deliver responsive and user-friendly web applications.
- Optimized database queries, stored procedures, and indexing strategies to improve application performance and data retrieval efficiency.
- Integrated backend services with frontend components and third-party APIs to support business requirements.

Skills

Frontend & UI Development: ReactJS, JavaScript, TypeScript

Backend Development: .NET Core, ASP.NET MVC, Web API, SQL Server, C#, Entity Framework, LINQ

DevOps & CI/CD: Docker, Azure DevOps CI/CD, GitHub Actions

Version Control: Git, GitHub

Project Management & Collaboration: JIRA, Agile Methodology

Tools: Visual Studio, VS Code

Projects

1. Profile Builder

Full-stack data management platform to create and manage structured profiles of globally identified Politically Exposed Persons (PEPs) for compliance and risk assessment. Built with ReactJS, ASP.NET Core Web API, and PostgreSQL.

Tech Stack: ReactJS, JavaScript, HTML5, CSS3, Bootstrap, C#, ASP.NET Core Web API, Entity Framework Core, PostgreSQL, Clean Architecture, LINQ, JWT Authentication, Swagger, Postman, Git, Dapper

2. ShopSphere

Modern e-commerce platform enabling seamless online shopping with efficient product, inventory, and order management. Built using ASP.NET Core MVC, Entity Framework Core, and SQL Server.

Tech Stack: C#, ASP.NET Core, ASP.NET Core MVC, Entity Framework Core, LINQ, SQL Server, Dependency Injection, Swagger, Git, Agile.

3. Avis Budget Group

Global car rental platform operating across EMEA, APAC, and other regions. Focused on backend modules of an **ASP.NET MVC** application supporting booking management, customer operations, and vehicle rental workflows.

Tech Stack: C#, ASP.NET, ASP.NET MVC, SQL Server, ADO.NET, RESTful APIs, Visual Studio, Postman, Git

Education

Bachelor of Technology (B. Tech)

Solapur University • Maharashtra

Jul 2018- Aug 2022
